

To whom this may concern,

My name is Adonis White, I attending the commissioners meeting on September 19, 2016. It was interesting that meeting was called to order by prayer and members saying the pledge of allegiance. The public was given a chance to speak on a few topic of interest. There were a few things that were mention at the meeting that needed attention which were the elderly needing assistance and different things going on around the county.

Members of the commissioner mention that the county was giving a grant that is to be use for to as assistance to the elderly people, disable individuals and parents who have trouble with their children. The commission also stated that they need a few volunteers to transport dirt to and from different locations. I learned a lot about how the meeting in the county is conducted and the order of services. There were a few political terms that was used in the meeting that I did not understand, but I learned a little about how the government conducts business, as well as, a few policies and procedure the commissioners follow to make sure the all items on the agenda was met. The commissioners meeting is conducted two times a month and each month some days are different than other but most of the meetings are conducted on a Wednesday around 10:00am and then two weeks later another commissioner meeting is conducted on a Monday at 7:00pm in the afternoon. Sometimes the county commissioners conduct a special meeting if something of importance or concern comes up, then there would be a third meeting.

The meeting I attended at the teen summit there was a speaker who was the president of the commission, he spoke about his mountain climbing experience. The meetings were very interesting it allowed me to learn a lot of things I did not know. The meeting was conducted in order and I thought it was outstanding whereas it allowed me to learn a lot.

Thank you for allowing me this experience. I would love to do this again the next year.

Sincerely,

Adonis White
