

## **OPPORTUNITY: MATCHING FUNDS AVAILABLE**

Vital Strategies will provide funding and technical assistance to North Carolina overdose prevention initiatives in the next 5 years. We are looking to collaborate with commissioners in counties where community-based naloxone distribution and/or syringe service programs (Option A: 7 & 9) already exist or where establishing them may reduce fatal overdoses. We will provide matching funds (ranging from \$10,000 to \$70,000) for counties interested in investing opioid settlement dollars into these evidence-based programs for up to 3 years. Please reach out to Kat Humphries [khumphries@vitalstrategies.org](mailto:khumphries@vitalstrategies.org) for more information.
